Attachments: proposed coordination procedures.for circulation.docx

Counsel,

Parties in the above-referenced cases write with a number of outstanding issues.

First, the privilege log produced on July 23, 2018 appears to have been formatted in such a way as to cut off relevant text. See, for example, the "Privilege Comments" for document 000660; the "File Name" for 001052, 001070; the "File Name" and "to" columns for 001322. Kindly reformat and re-produce this log.

Second, the parties anticipate the necessity of a meet and confer in the coming days. Accordingly, please let us know your availability for a phone call on Monday afternoon or Tuesday before noon. During this call, we anticipate discussing issues relating to the Defendants' document production and privilege log, as well as depositions and the Department of Justice subpoena.

Third, while Defendants have provided us with availability for some deponents, we have not received dates for all potential witnesses. In addition to the names previously circulated (with the exception of Mr. Walsh, whom Plaintiffs do not intend to depose at this time), kindly provide availability for Karen Dunn Kelley and Earl Comstock.

Finally, pursuant to the Court's directive on July 3, attached please find proposed coordination procedures. These procedures have been signed off on by parties in the Maryland, California, and New York cases. Please let us know if you have any edits to this proposed procedures; we hope to submit these to the Court this week.

Please let me know if you have any questions.

Best,
Elena

Department of Commerce, S.D.N.Y. 18-CV-5025: Department of Justice Discovery
Attachments: Census Abowd Deposition Notice.pdf; Census Jarmin Deposition Notice.pdf

Counsel --

This will acknowledge Garrett's email from 10:30 this morning. I have instructed the NYIC team in accordance with Rule 26(b)(5), and understand the State of New York team has as well.

We wanted to check in on a few things:

1. Attached please find deposition notices for Messrs. Abowd (for August 15) and Jarmin (for August 20). We should be able to lock in the date for Ms. Teramoto's testimony early next week.
2. Last week, we sent a copy of the Department of Justice subpoena (with a return date for testimony starting on August 13) and a draft Census Bureau Rule 30(b)(6) notice. As I advised when I sent the notice, we plan to revise the list of Census Bureau topics in light of the supplements to the Administrative Record, and send a final notice next week, with a notice date of August 14. That date was requested by counsel from the various California cases, who have asked that we try to cluster depositions because of travel considerations.
3. We are still waiting for dates from you for Messrs. Gore and Comstock and Ms. Dunn Kelley. Also -- we should advise that we believe the testimony called for in the Department of Justice Rule 30(b)(6) notice may be adequate to cover the testimony we requested from Mr. Herren.
4. We are still waiting on your position whether you will consent to the filing of an amended complaint naming DoJ, the Attorney General and Mr. Gore (in their official capacities) as Defendants.
5. Earlier this week, the State of New York sent a draft of proposed coordination procedures, which reflect the discussion from our last meet and confer, as well as the positions of the plaintiffs in the California and Maryland cases. Could you let us know whether the Government is OK with plaintiffs submitting this letter jointly?
6. We are still waiting for a response on the request we made earlier this week for a meet and confer on Monday afternoon or Tuesday morning regarding the supplement to the Administrative Record and the assertions of privilege reflected in the log, as well as depositions and the Department of Justice subpoena.

In advance of the meet and confer, we wanted to raise three issues regarding privilege assertions to see if we might be able to shorten the agenda by getting appropriate relief.

- a. There are approximately 60 documents we have identified where materials have been improperly redacted, ostensibly because of Title 13. The relevant provisions of Title 13 are geared to ensure data privacy for individuals. Title 13 protects, at most, the identities of persons and arguably raw Census data reported by or on behalf of individuals. Based on the sample we have reviewed, the redactions we have seen all appear

to be of summary statistical conclusions made about aggregated data, which in no way implicate any individuals' privacy. *See* AR 10509, 10742, 10849, 10975, 11003. We request that the improperly redacted documents be reproduced promptly.

b. We have seen assertions of attorney work product that significantly pre-date the onset of litigation in this matter, and accordingly do not appear to have been prepared in anticipation of litigation. For example, AR 3984 asserts work product over a document sent on August 10, 2017 and AR 2035 asserts work product over a document sent September 7, 2017. We do not see any indicia on the privilege log or production log that any litigation hold notice was ever sent, much less prior to these communications. Can you advise when the earliest litigation hold notice issued by the Department of Commerce was sent and point us to where it can be found in your production? Alternatively, if you conclude that work product was not properly asserted as to these documents, please reproduce the relevant documents.

c. We have seen at least one instance where there has been an attorney-client privilege assertion with regard to communications between a government lawyer and an individual we understand is not a government employee -- A. Mark Neuman. *See* AR 2051. The other privileges asserted over the document are questionable if Mr. Neuman was not a government employee. If you conclude that this document is not privileged, please reproduce the relevant document.

There are a number of other issues we plan to raise on the meet and confer. But if you are able to address these issues, that will shorten our agenda.

Thanks and best regards,

John

Subject: State of New York v. Department of Commerce, S.D.N.Y 18-CV-2921; NYIC v.
Department of Commerce, S.D.N.Y. 18-CV-5025: Meet & Confer Request

Counsel --

We wish to raise three matters:

1. This is the fourth email we are sending since last Wednesday to request a meet and confer regarding the Government's production of the supplemental administrative record. Counsel for both the State of New York and NYIC cases remain available to discuss this afternoon and tomorrow morning.

Judge Furman's practice requires disputes of this nature to be raised "promptly." In the event we do not hear from you shortly, we will assume the Government does not wish to confer about these matters and will proceed accordingly.

2. In advance of the meet and confer, we have identified several further issues we hope the Government will address to shorten our agenda:

- a. Log Entries that Fail to Comply with Rule 26(b)(5) and S.D.N.Y. Local Rule 26.2(a)(2)(A): For many documents that appear to have been withheld in their entirety, the log fails to identify sufficient information to enable us to identify assess the privilege claim -- many log entries identify neither the date of the document, the author or custodian or any other recipients of the documents, e.g., 3902, 4054, 4349, 5418, etc. The Government should promptly produce a log that provides this information for every document withheld.
- b. Census Bureau Team Folder: We have seen references in the production to Mr. Abowd's "swat" team having a team folder and/or a shared drive or intranet site. In a related context, we have also seen a reference to a site his team used called: SECURE_ADREC_2020, e.g., 7505, 9616, 11200. Have the contents of these folders been provided? If so, where are they in the record?
- c. Native Files and Other Withheld Materials: There are documents we have seen where a slip sheet has been produced indicating the original document was not produced because it is a native file or encrypted, e.g., 7516, 9570, 9621, 9836, 9837. These are not a valid basis to withhold materials. These and any similar materials should be produced.
- d. Work Product Assertions: With regard to the work product assertions, we have found a document (3888) asserting work product as early as May 24, 2017. So our questions regarding work product assertions should be addressed relative to that date.

To be clear, there are a number of other substantive points we plan to raise when we talk. But our hope is that you will be able to address these before our discussion.

3. We wanted to check whether you will have any changes to the coordination procedures letter that New York sent last Wednesday. We believe this reflects the agreements we reached when we met and conferred on July 13 and accurately reports the points of disagreement. We plan to submit to the Court tomorrow, so in the absence of receiving any edits from you, we will assume you still agree with the outlined procedures.

Thanks and best regards,

John

U.S. Census Bureau
Washington, DC 20233-0001

July 20, 2018

MEMORANDUM FOR: Ron S. Jarmin
Performing the Non-exclusive Functions and Duties of the Director

From: John M. Abowd 
Chief Scientist and Associate Director for Research & Methodology

Prepared by: Stephen Buckner, Patrick Cantwell, Joanne Crane, Melissa Creech, Burton Reist,
and James Whitehorne

Subject: Summary of Quality/Cost of Alternatives for Meeting Department of Justice
Request for Citizenship Data

The Department of Justice has requested census block-level citizen voting-age population estimates by OMB-approved race and ethnicity categories from the 2020 Census of Population and Housing. These estimates are currently provided in two related data products: the PL94-171 redistricting data (PL94), produced by April 1st of the year following a decennial census under the authority of 13 U.S.C. Section 141, and the Citizen Voting Age Population by Race and Ethnicity (CVAP) tables produced every February from the most recent five-year American Community Survey data. The PL94-171 data are released at the census block level. The CVAP data are released at the census block group level.

There are three alternatives for meeting the DoJ request:

Alternative A: Maintain the status quo for data collection, preparation and publication. After the regular PL94 and CVAP data have been published in 2021, prepare a special product for DoJ that combines these tables to produce a Census Bureau best estimate of the block-level citizen voting age population by race and ethnicity. This would be similar to the approach now used to support the Section 203 requirements of the Voting Rights Act.

Alternative B: Add a citizenship question to the 2020 Census questionnaire. Process the citizenship question using the 2020 Census data processing system, including using administrative records where currently authorized and implemented. Produce the block-level tables of citizen voting age population by race and ethnicity during the publication phase of the 2020 Census.

Alternative C: Do not add a citizenship question to the 2020 Census questionnaire. Add the capability to link an accurate, edited citizenship variable from administrative records to the final 2020 Census microdata files. Produce the block-level tables of citizen voting age population by race and ethnicity during the publication phase of the 2020 Census using the enhanced 2020 Census microdata.

An analysis of the cost and quality implications of each alternative follows.

For Alternative A, the cost would be similar to the cost of the every-five-year production of language determinations to support DoJ enforcement of Section 203 of the Voting Rights Act. We estimate that the incremental cost of producing Alternative A is approximately \$[REDACTED]. This estimate is based on the total cost of producing the 2016 language determinations. These costs are the salaried time of staff in the Redistricting Office, the Policy Coordination Office, the American Community Survey Office, and the Center for Statistical Research and Methodology. We estimate that delivering block-level citizen voting age population tables by race and ethnicity based on statistical modeling of the 2020 PL94-171 and CVAP tables would be a similar effort in terms of both cost and quality.

For Alternative B, our estimate of the incremental cost is as follows. We estimate that there will be approximately [REDACTED] addresses in the 2020 Census. Recent American Community Survey (ACS) data indicate that [REDACTED] % of households contain at least one non-citizen. This yields an estimate of [REDACTED] million households with at least one non-citizen. Our analysis of 2010 response data for both the American Community Survey and the Short-Form Census indicates that the presence of a question on citizenship suppressed response by [REDACTED] percentage points for these households. Based on our working assumption of a response rate of [REDACTED] % in the 2020 census, a reduction of [REDACTED] percentage points for households containing at least one non-citizen will increase the Nonresponse Follow-up (NRFU) workload by approximately [REDACTED] households, or approximately [REDACTED] percentage points. We estimate that for each percentage point increase in NRFU the cost of the 2020 Census increases by approximately [REDACTED] million. Accordingly, the addition of a question on citizenship could increase the cost of the 2020 Census by at least \$[REDACTED] million. It is worth stressing that this cost estimate is a lower bound. Our estimate of \$[REDACTED] million for each percentage point increase in NRFU is based on an average of three visits per household. We expect that we would make a total of six visits to households containing non-citizens who did not self-respond. We also believe that the decrease in response for these households in 2020 could be greater than the [REDACTED] percentage points we observed during the 2010 Census.

Alternative B would most likely deliver higher quality block-level citizen voting age population by race and ethnicity data than Alternative A because it is based on obtaining a direct report of citizenship status for each respondent. But it would result in lower quality enumeration data. Because of the estimated [REDACTED] percentage point increase in NRFU for households with noncitizens and because NRFU is less accurate than self-reports, there is a decrease the coverage quality of the census. We estimate that asking the citizenship question would result in [REDACTED] fewer correct enumerations. This is also a lower bound estimate on the loss of accuracy.

For Alternative C, the cost estimate has not yet been fully vetted. The estimated cost is less than \$[REDACTED]. In the current system of administrative data acquisition and processing for the 2020 Census, there are ten remaining data acquisitions between January 1, 2018 and April 1, 2020. We include the cost of these data acquisitions in our incremental cost estimate for Alternative C because it would no longer be an option to discontinue the acquisition of these data and use only the already acquired files. In addition, we include the cost of two senior analysts. The analysts would do the required integration of the edited citizenship into the 2020 Census microdata. This estimate does not include the cost of modifying existing Memoranda of Understanding with the agencies that supply the data used to acquire the citizenship variable because those negotiations are already in progress, and would continue. This estimate also does not include the cost of negotiating a new MOU with the United States Citizen and Immigration Services to acquire those data, refreshed appropriately over the 2020 Census life cycle because we have not yet gathered the required information from USCIS to estimate this cost.

Alternative C delivers higher quality data than Alternative B for DoJ's stated uses. Our primary data sources for the administrative record citizen variable require proof of citizenship. For this reason, they are very accurate. There is good evidence that citizenship is accurately reported by citizens, but less accurately self-reported by household responders for noncitizens. This accuracy deficit in the self-responses may be due to the inherent difficulty of the respondent knowing the citizenship status of everyone in the household. Proxy respondents are even less likely to know the citizenship status of all members of the household. It may also be due to the sensitivity of the citizenship question itself. For DoJ's stated purposes, Alternative C produces the highest quality data.

Alternative A is not very costly and does not harm the quality of the census count. Alternative B better addresses DoJ's stated uses; however, it is very costly and does harm the quality of the census count by increasing erroneous enumerations. Alternative C even better meets DoJ's stated uses, is comparatively far less costly than Alternative B, and does not harm the quality of the census count. For these reasons, we recommend Alternative C for meeting the Department of Justice data request.

 - a. ACS Fiscal Year 2014 Content Review Interviewer Survey examined how interviewers felt the citizenship question operated in the field
 - i. 35.3% of interviewers reported this was a sensitive question
 - ii. 23.6% of interviews said it was cognitively difficult (the question was confusing, other answers were given, or it took longer to answer)
 - iii. 11.7% of interviewers felt the question was very difficult or difficult
 - iv. Overall results of the study did not identify citizenship as a problematic question
 - v. Source: Raglin, Dave. 2014. "American Community Survey Fiscal Year 2014 Content Review Interviewer Survey Results." Available online at http://www2.census.gov/programs-surveys/acs/operations_admin/2014_content_review/methods_results_report/Interviewer_Survey_Results_Report.pdf
 - b. ACS 2012 Content Reinterview Survey tested reliability of citizenship question
 - i. The aggregate index of inconsistency for citizenship was low
 - 1. All individual response categories were low except for "U.S. citizen, born abroad of American parent(s), which was moderate
 - ii. Gross difference rate for citizenship was similar across ACS data collection mode (mail, CATI, CAPI)
 - iii. Gross difference rate for citizenship varied across race and Hispanic origin, with slightly higher difference rates for Asians and Hispanics
 - iv. Source: Murphy, Padraic. 2013. "American Community Survey 2012 Content Reinterview Survey." Available online at http://www.census.gov/content/dam/Census/library/working-papers/2014/acs/2014_Murphy_01.pdf
 - c. Imputation rate for citizenship is reasonable
 - i. In 2014, imputation rate for citizenship at the national level was 5.5%
 - ii. In 2014, imputation rate for citizenship for the native born was 5.3% and imputation rate for the foreign born was 6.8%
 - iii. Source: 2014 ACS Survey 1-Year data, AFF table B99051
 - iv. Imputation rate for citizenship question in 2015 CPS is lower than in ACS
 - 1. 98.97 % of responses in 2015 ASEC supplement were reported, 0.73% were assigned, and 0.30% were allocated

5. Characteristics of citizens and non-citizens in CPS data

- a. CPS data: FBPB staff ran special tabulations of the sociodemographic characteristics of citizens and non-citizens using the 2015 CPS ASEC files.

These highlights are for internal use only and have not been stat tested:

- i. A smaller proportion of non-citizens were in the youngest and oldest age groups compared to citizens
 1. █% of non-citizens and █% of citizens were under 15 years old
 2. █% of non-citizens and █% of citizens were 65 years and over
- ii. While █% of non-citizens were male, █% percent of citizens were male
- iii. Non-citizens were less likely to be non-Hispanic white than were citizens
 1. While █% of non-citizens were non-Hispanic white, █% of citizens were non-Hispanic white
 2. █% of non-citizens were Hispanic compared to █% of citizens
 3. █% of non-citizens were non-Hispanic Asian alone compared to █% of citizens
 4. █% of non-citizens were non-Hispanic black alone compared to █% of citizens
- iv. Compared to █% of non-citizens age 15 and over, █% of citizens were married. While █% of non-citizens were divorced, █% of citizens were divorced.
- v. Non-citizens were more likely than citizens to live in married couple households and were less likely than citizens to live in nonfamily households.
 1. █% of non-citizens lived in married couple households compared to █% of citizens
 2. █% of non-citizens lived in nonfamily households compared to █% of citizens
- vi. Non-citizens lived in larger households than citizens. Sixty-two percent of non-citizens lived in households with 3 or more people while only █% of citizens lived in households of that size
- vii. A greater proportion of non-citizens had less than a high school diploma compared to citizens. Non-citizens were slightly less likely than citizens to have a master's degree or higher.
 1. █% of non-citizens had less than a high school diploma compared to █% of citizens

2. [REDACTED] % of non-citizens had a master's degree or higher compared to [REDACTED] percent of citizens
- b. CPS data by allocation status: FBPB staff ran special tabulations of the sociodemographic characteristics of respondents whose citizenship value was reported, assigned, and allocated. These highlights are for internal use only and have not been stat tested:
 - i. Overall, the citizenship question in CPS had a low imputation rate. In 2015, [REDACTED] % of values were reported, [REDACTED] % were assigned, and [REDACTED] % were allocated.
 - ii. Non-citizens had a higher allocation and assignment rate than citizens.
 1. While [REDACTED] % of non-citizens had reported values, [REDACTED] % of citizens did. While [REDACTED] % of non-citizens had their citizenship value assigned, only [REDACTED] % of citizens did. Similarly, [REDACTED] % of non-citizens had their citizenship value allocated compared to [REDACTED] % of citizens.
 - iii. Non-citizens had a larger share of the population with allocated values than of the total population.
 1. Among the population with allocated values, [REDACTED] % were non-citizens. In contrast, non-citizens were [REDACTED] % of the total population.
 2. Among the population with assigned values, [REDACTED] % were non-citizens, and among the population with reported values, [REDACTED] % were non-citizens.
 - iv. Hispanics had the highest allocation rate for the citizenship question. While [REDACTED] % of Hispanics had an allocated value, [REDACTED] % of all non-Hispanic race groups had allocated values.
 1. The non-Hispanic Asian alone group had the highest assignment rate for the citizenship question. About [REDACTED] % of the non-Hispanic Asian alone group had an assigned value, compared to [REDACTED] % of Hispanics and [REDACTED] % of other non-Hispanic race groups.
 2. Hispanics and non-Hispanic Asian alone groups had the lowest rates of reported values for the citizenship question ([REDACTED] %).
6. Characteristics of citizens and non-citizens in ACS data
 - a. ACSO staff ran special tabulations of the sociodemographic characteristics of citizens and non-citizens using the 2014 ACS 1 Year File. These highlights are for internal use only and have not been stat tested
 - i. Citizens were more likely than non-citizens to be non-Hispanic white alone ([REDACTED] % compared to [REDACTED] %)

1. █% of non-citizens were non-Hispanic black alone compared to █% of citizens
2. █% of non-citizens were non-Hispanic Asian alone compared to █% of citizens
3. While █% of non-citizens were Hispanic of any race, █% of citizens were Hispanic
- ii. While citizens comprised █% of the total population, the citizenship distribution varied by race and Hispanic origin.
 1. █% of people who were non-Hispanic white alone were citizens and █% of people who were non-Hispanic black alone were citizens
 2. In contrast, █% of people who were non-Hispanic Asian alone were citizens and █% of Hispanics of any race were citizens
- iii. A smaller proportion of non-citizens were in the youngest and oldest age groups compared to citizens
 1. █% of non-citizens and █% of citizens were under 18 years old
 2. █% of non-citizens and █% of citizens were 65 years and over
- iv. While █% of non-citizens lived in family households, █% of citizens did so
- v. A greater proportion of non-citizens had less than a high school diploma compared to citizens. Non-citizens were slightly less likely than citizens have a Bachelor's degree or higher
 1. █% of non-citizens had less than a high school diploma compared to █% of citizens
 2. █% of non-citizens had a Bachelor's degree or higher compared to █ percent of citizens
- b. ACS data by allocation status: ACSO staff ran special tabulations of the sociodemographic characteristics of people whose citizenship value was reported or changed and whose citizenship value was allocated using the 2014 ACS 1 Year File. These highlights are for internal use only and have not been stat tested:
 - i. For these analyses, we combined people who reported a value for citizenship with people whose citizenship value was assigned or changed based on other information from the individual or household. We then compared this combined group to people whose value was allocated through hot deck imputation.
 - ii. People with reported or changed citizenship values were more likely to be non-Hispanic white alone than people with allocated citizenship values (█% compared to █%)

1. People with reported or changed citizenship values were less likely to be non-Hispanic Asian than people with allocated citizenship values (■■■■% compared to ■■■■%)
 2. People with reported or changed citizenship values were less likely to be Hispanic of any race than people with allocated citizenship values (■■■■% compared to ■■■■%)
 - iii. People whose citizenship value was allocated were less likely to be in the youngest age groups and more likely to be in the oldest age groups than people whose value was reported or changed
 1. ■■■■% of people with a reported or changed citizenship value were under 18 years old compared to ■■■■% of people with an allocated value
 2. ■■■■% of people with a reported or changed citizenship value were 65 years and over compared to ■■■■% of people with an allocated value
 - iv. A greater proportion of people with allocated citizenship values had less than a high school diploma compared to people with reported or changed values (■■■■% compared to ■■■■%)
7. Federal surveys that include citizenship question
- a. ACS
 - b. CPS
 - c. Long form of the Decennial Census (up to 2000)
 - d. SIPP
 - e. NLSY79 (National Longitudinal Survey of Youth)
 - i. Conducted by BLS
 - ii. Asked immigration status and country of citizenship in 1990
 - iii. Also asked citizenship in NLSY97 panel
8. Non-federal surveys that include citizenship question
- a. Panel Study of Income Dynamics (PSID): Asked citizenship status questions in 1997 and 1999; primarily asked if head of household was a naturalized citizen
 - b. General Social Survey (GSS)
 - i. Used version of “three card method” to ask about citizenship in 2004
 - ii. Asked about intent to apply for citizenship
9. Next steps
- a. Produce ACS special tabulation with characteristics by citizenship status and citizenship imputation status. FBPB has requested these tables from ACSO.

- b. Produce CPS special tabulation with characteristics by citizenship status and citizenship imputation status. FBPB has begun to produce these tables.
- c. Could possibly look at ACS internet instrument metadata to determine rate at which respondents stopped the survey after the citizenship question
- d. Could possibly listen to ACS CATI interviews with foreign-born respondents to see how they react to the citizenship question
- e. Search academic literature for research on data quality of citizenship questions and research on the impact of citizenship questions on survey response rates
- f. Explore non-federal surveys for research on the impact of citizenship questions on survey response rates
- g. Conduct a national content test with a split sample where half the respondents receive the citizenship question and half do not. Comparing response rates across the two groups would be the primary way to test the impact of the citizenship question on survey response rates.

EXHIBIT 4-C

Survey Response vs. Model Measurement Error

Under alternative D, [REDACTED] persons will have a survey response, but without adres information. Citizenship for these people would be modeled in alternative C. What is the nature of the measurement error in each method?

The ACS-Numident comparison suggests that Numident citizens nearly always directly respond that they are citizens, when they respond at all, while many Numident noncitizens directly respond that they are citizens. This suggests an upward bias in the citizen count from direct responses.

What can we say about the nature of the bias from modeling, given that we haven't developed a model yet for unlinked persons, no truth deck exists, and they are not unlinked at random?

These [REDACTED] unlinked people may react to the citizenship question by:

1. citizenship nonresponse: modeling under both alternatives. This is the [REDACTED].
2. correct citizenship response: switch from modeling in alternative C to direct response in alternative D. This is part of the [REDACTED].
3. incorrect citizenship response: switch from modeling in alternative C to direct response in alternative D. This is part of the [REDACTED].

How will removing these [REDACTED] persons from modeling affect the modeling of the remaining [REDACTED] persons? If these groups are systematically different in ways we can observe, that could improve the modeling of the [REDACTED]. But what are the differences in the observable characteristics of persons who respond incorrectly vs. not respond? Part of the problem is that we may not observe much else about these people, since they aren't linked to adres and their propensity to have item nonresponse on other questions is likely to be high.

EXHIBIT 5

U.S. Department of Justice
Civil Division, Federal Programs Branch
20 Massachusetts Avenue NW
Washington, DC 20530

August 1, 2018

Section 9 of Title 13 (“Title XIII”) governs the protection of statistical data used in the development of the census. Title XIII precludes the Secretary of Commerce, his employees, or any person who has sworn to protect this sensitive information from making “*any* publication whereby the *data* furnished . . . can be identified.” (emphasis added). In *Baldrige v. Shapiro*, the Supreme Court interpreted the language of Section 9 literally, emphasizing that the language places confidentiality protections on the data itself. 455 U.S. 345, 356 (1982) (observing that “the language of each section refers to protection of the ‘information’ or ‘data’ compiled . . . By protecting data revealed ‘on behalf of’ a respondent, Congress further emphasized that the data itself was to be protected from disclosure. The legislative history also makes clear that Congress was concerned not solely with protecting the identity of individuals”). The language of Sections 8(b) and 9 express an explicit congressional intent to preclude all raw census data from the reach of civil discovery. *Id.* at 361.

Plaintiffs have identified certain redactions in produced documents (that they do not believe are subject to the protections of Title XIII because the information reflects percentages or statistical summaries from aggregated data and thus do not implicate any individuals’ privacy. *See e.g.*, AR 10509, 10742, 10849, 10975, 11003)

The disclosure of data subject to Title XIII can occur even in the absence of identifying information. Just because someone’s specific name or address does not appear, it does not mean that certain data (or analysis about the difference between two data points) does not implicate an individual’s confidentiality. One must understand that the composition of the cited statistics are, themselves, samples, and the analysis of those samples changes frequently, especially during the process of confirming that the various data files have been properly extracted, loaded and linked. Differences in results that arise from this process can easily expose single micro-data records and, thus, information subject to non-disclosure under Title XIII. Therefore, the primary reason such releases are barred from disclosure is to avoid any type of disclosure that could be brought about by deriving information from the known (or discovered) differences. Title XIII requires the Census Bureau to account for such “complementary disclosure,” which is the release of data that does not appear to contain individually identifiable information (e.g., name, address, social security information, birth date, etc.), but could result in identifying individuals when that data is coupled with other information in existing Census Bureau publications and in publicly-available information. For example, while a preliminary percentage, standing alone, may not reveal personally identifiable information, when such a percentage is combined with other information, it can and has been used by sophisticated parties to derive personally identifiable information.

The same is true for aggregate statistics. Accordingly, the withholding of percentages and statistical information falls well within the protections of Title XIII and may not be disclosed.
